### Innovative design

- Stability like never before

### No red marks on the bridge of the nose

- Cushion under the nose

### Unobstructed view

- Provides freedom of movement throughout the night
- Open field of vision

# DreamWear Nasal

Under the nose nasal mask

## Highlights

### Nasal cushion

The mask cushion lies gently under the nose, which helps to prevent pressure points on the bridge of the nose and unpleasant skin irritations on the nostrils.

### A more natural sleep

DreamWear combines the advantages of minimal contact masks and nasal masks, provides high comfort and can contribute to successful sleep therapy.

### Top-of-head tube connection

The exhaled air is not discharged directly at the nose, but at the top of the head. This hose positioning allows for more freedom of movement throughout the night.

### Read or watch TV

Thanks to the open design, DreamWear offers an open field of vision, so you can easily wear glasses and read, watch TV or use a tablet PC in bed before going to sleep.

### Soft, flexible mask frame

The flexible material, through which the air flows, gently rests on the skin, prevents pressure points and provides a comfortable fit.

### Innovative mask design

The innovative design of DreamWear helps to prevent pressure sores and skin irritation on the nostrils and on the nose bridge, and allows the user, in addition to a clear field of vision, more freedom of movement through the hose connection on the head.

### More comfort with DreamWear

Users said DreamWear was more comfortable to wear than their previously prescribed mask, as it is barely noticeable.
