

Philips DreamWisp

Comfort with every turn

DreamWisp is our nasal mask specially designed with a secure, minimal contact nasal seal. This helps the mask stay securely on your face as you move during the night.

DreamWisp's design directs airflow through the frame so you can sleep comfortably, and the tubing connection located at the top of the head allows you the freedom to sleep in any position you desire — on your stomach, side or back.

ALWAYS READ THE LABEL AND FOLLOW THE DIRECTIONS FOR USE.
